

ALICE

TURNS
GREEN!

By: Rowen
Elizabeth
Caldwell

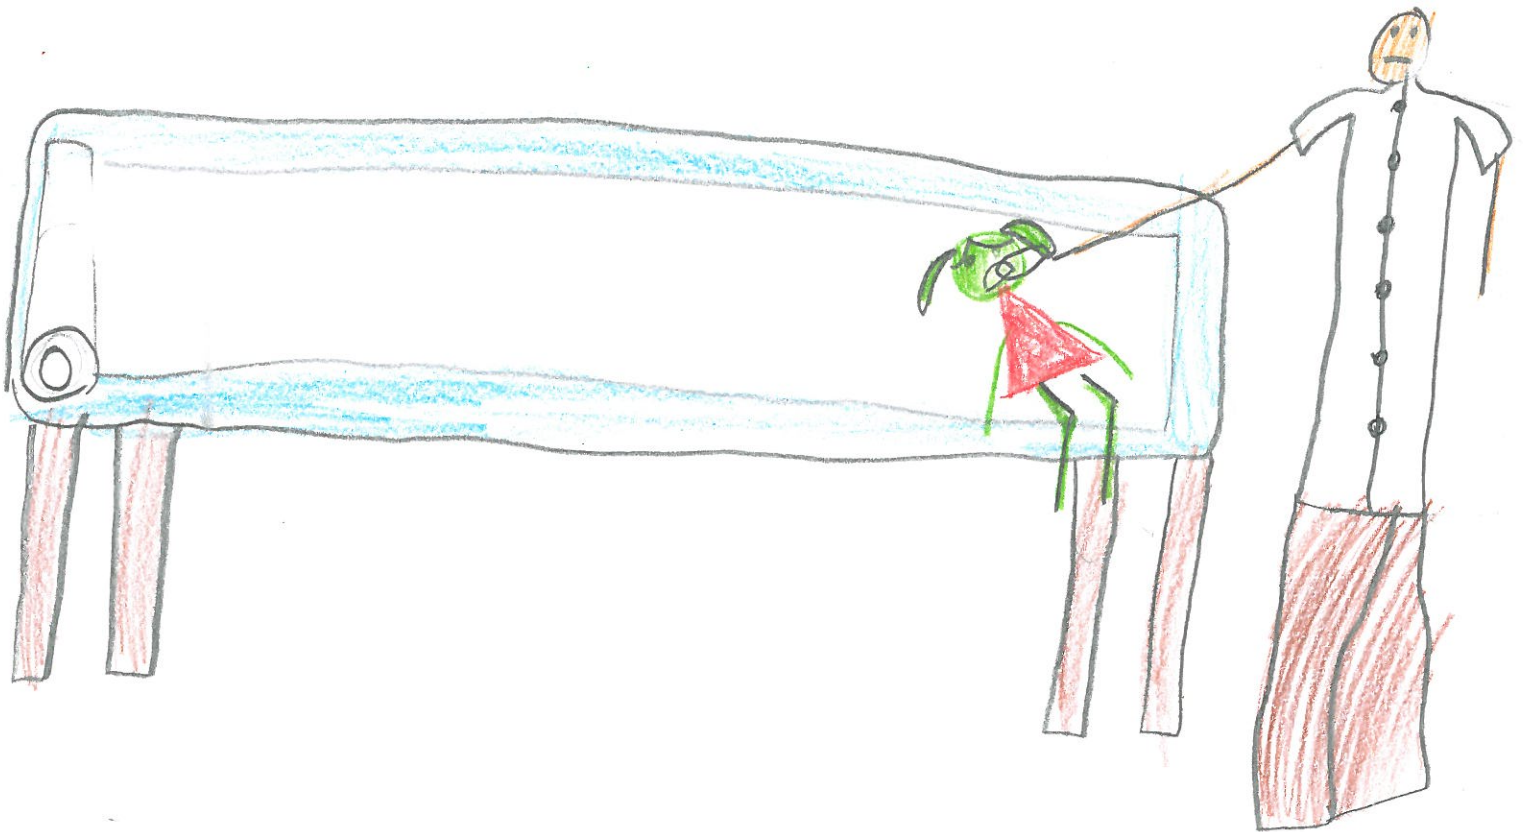

one day, Alice turned green.
Her parents didn't know why!
So, they took her to the doctor.

The doctor started by
looking in her ears.
"All clear, Alice" he said.

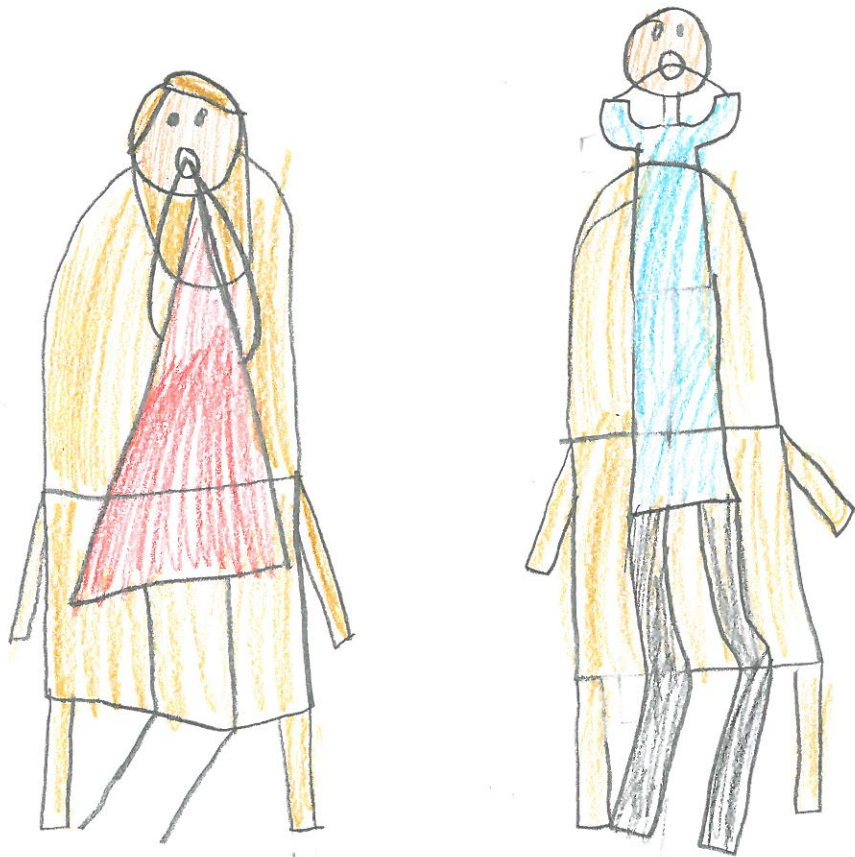

Next, he said "I'm going
to check your throat."
He did not see a problem there.
"All clear, Alice."

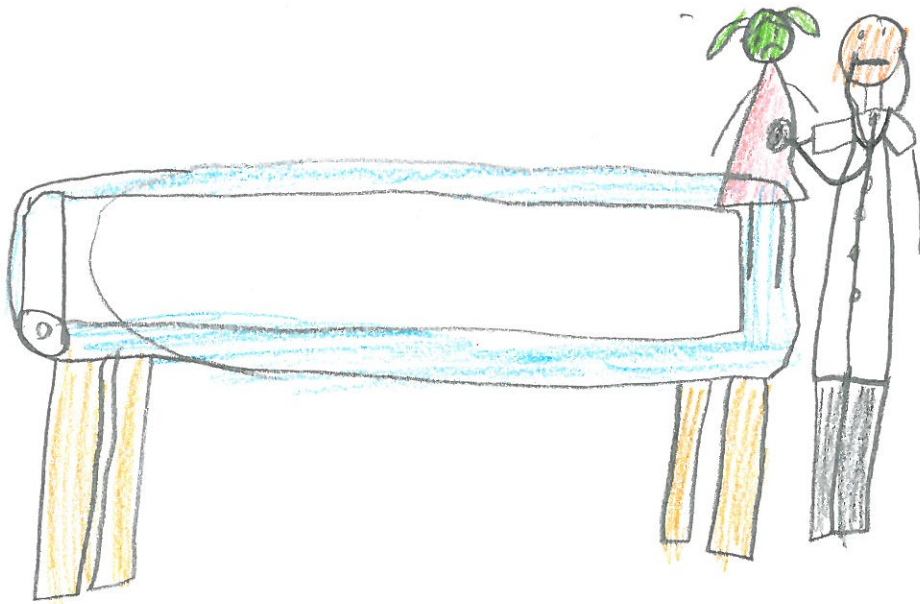

Alice's parents were
getting super worried.

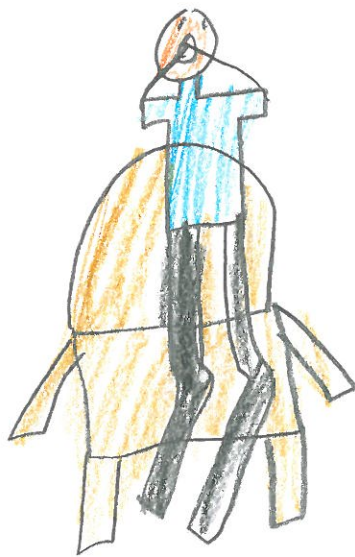

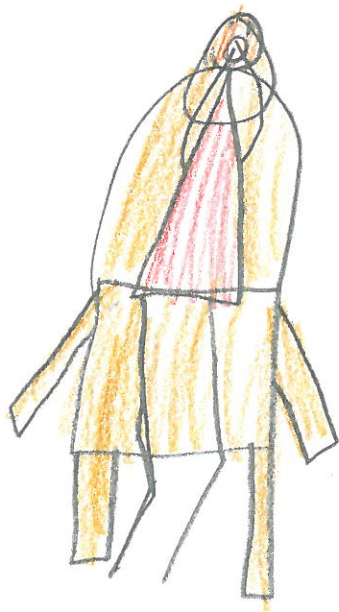

Why was their
daughter green?

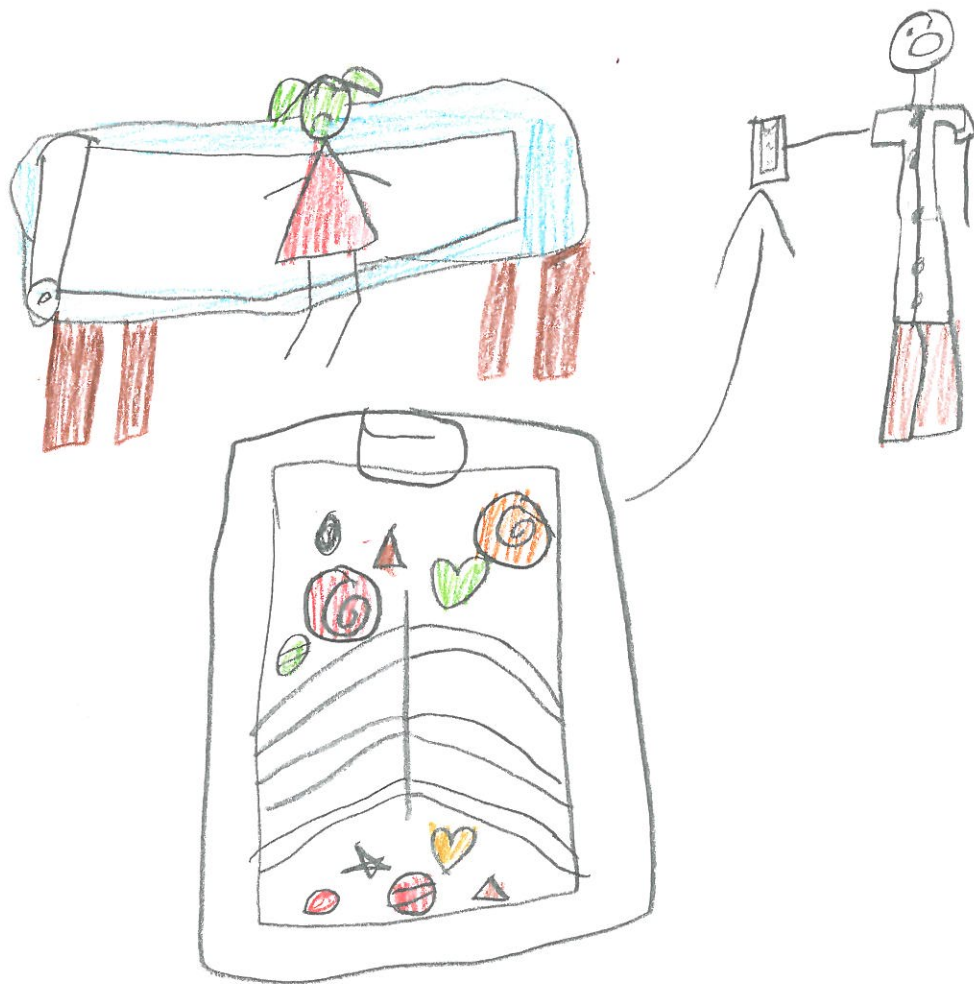

Next, he checked
her heartbeat. "Breathe
in normally and
out normally." breathe
breathe

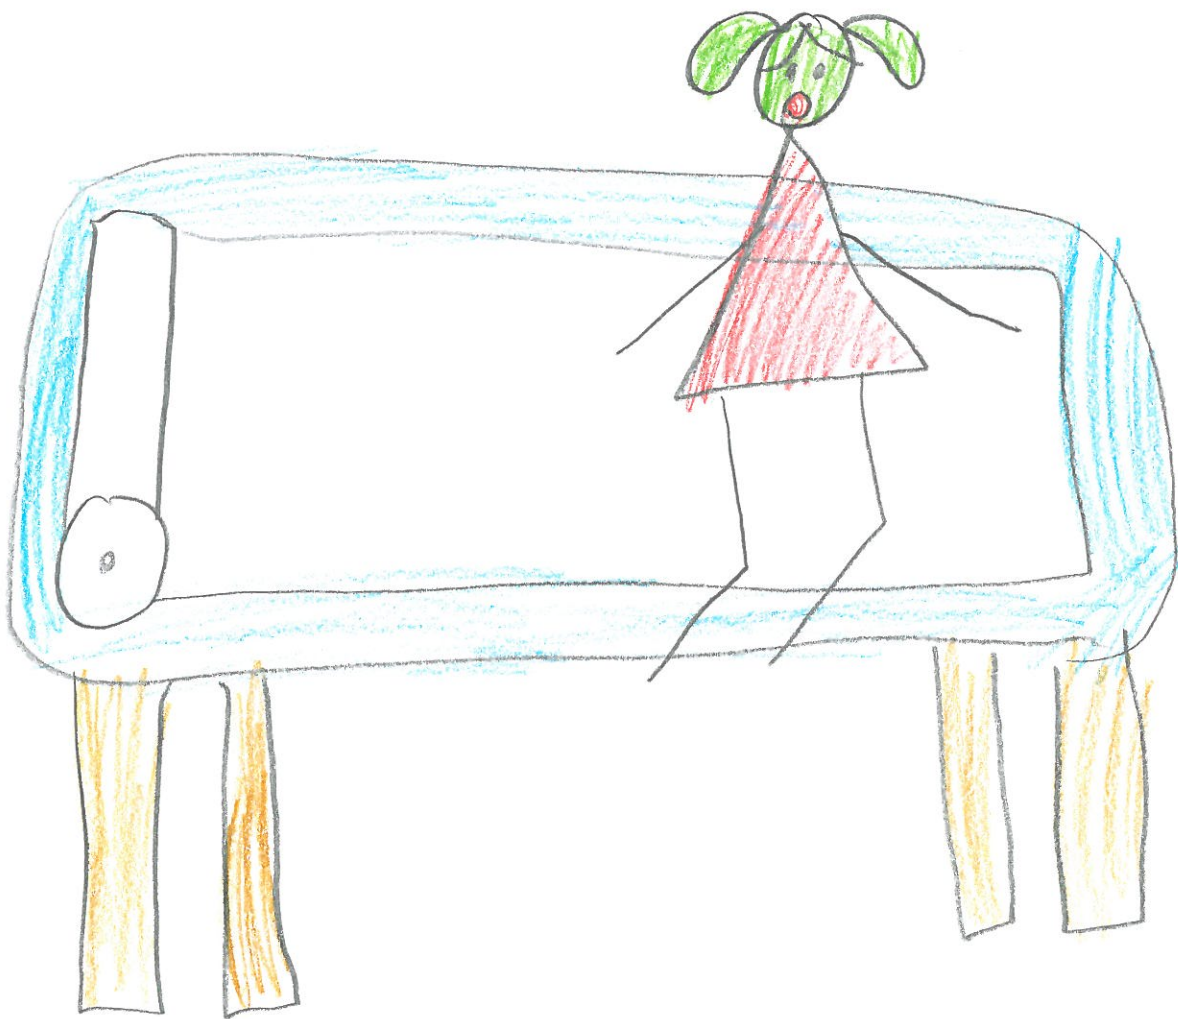

The doctor started to feel
like she was very sick and
ordered an x-ray. Alice's
parents were worried and
scared. Alice was greener
than ever!

He came in and said
"I think I know what
the problem is. It
is a lot of candy in
your stomach. Am I
correct, Alice?"

"Yes, doctor I just
love candy, I couldn't
stop eating it."

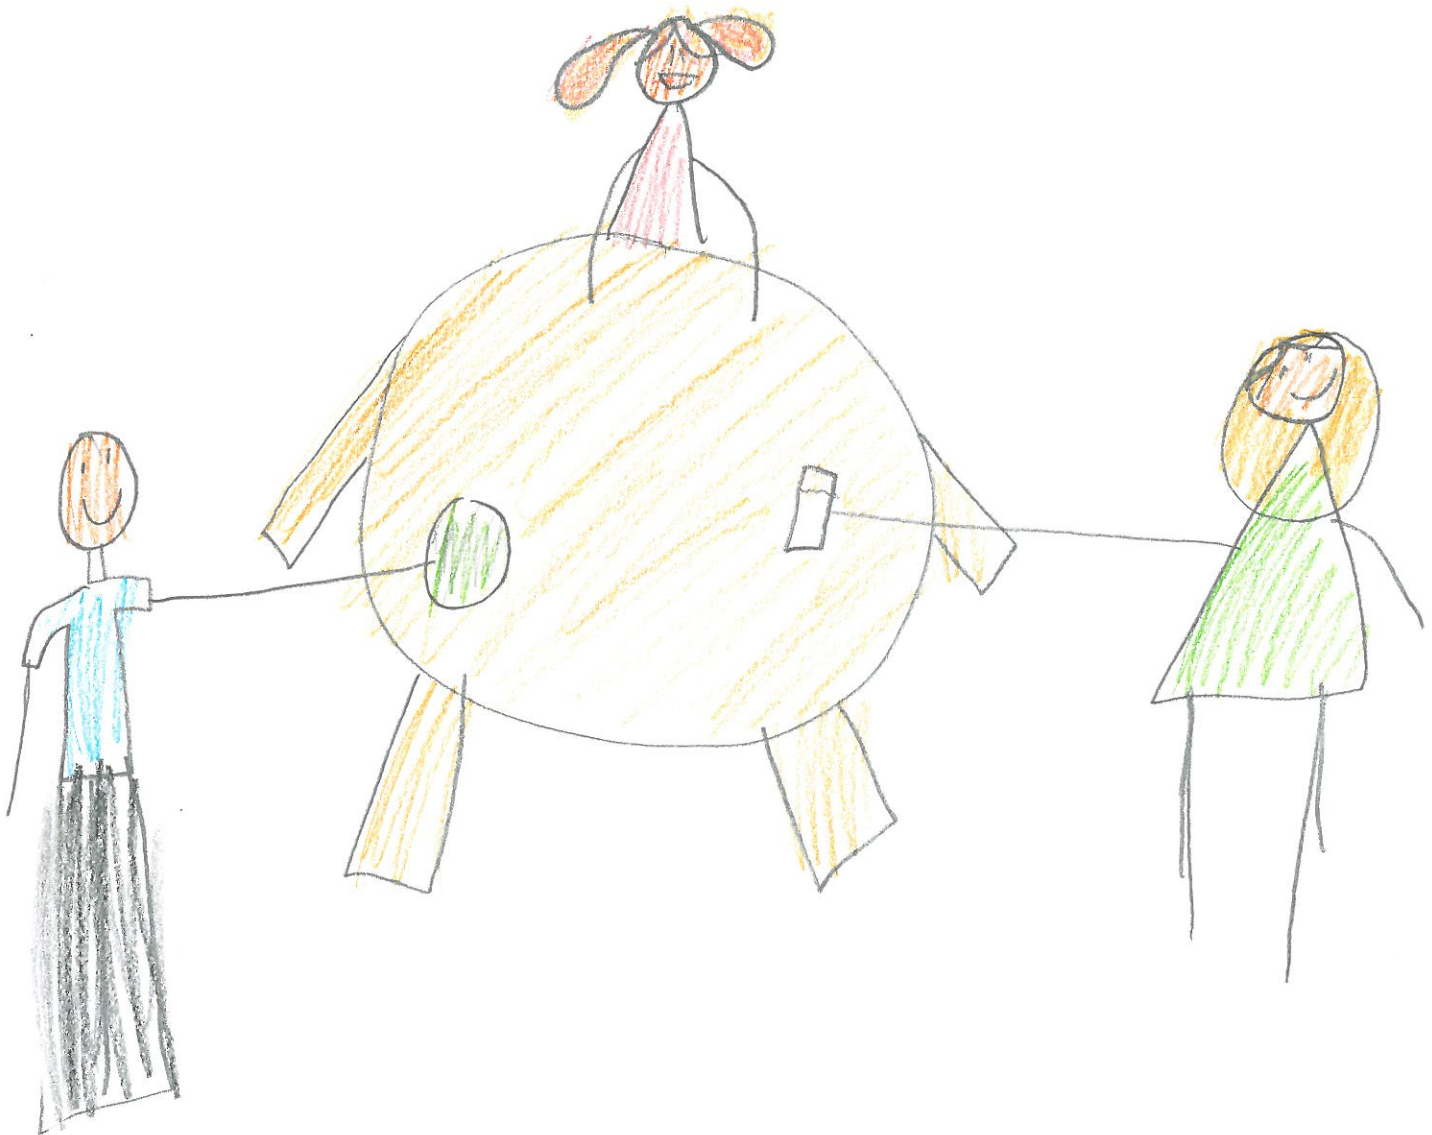

"Well it doesn't love you
Alice. Here is an apple try
that instead."

All the sudden her
green went away and
she started to go back
to normal.

"Feeling good is better
than candy," said Alice.
"Drink this milk" said Mom.
"Here is some salad" said
Dad.

Alice loves food
more than candy now.
And she will be healthy
and never turn green again
