Wednesday 1

7:00 Nature *New*

"American Spring Live: Connections" - Nature's perfect partnerships, precisely synchronized, have evolved over thousands of years. See first-hand how climate change can break those connections, altering the timing of weather and plant growth, and disrupting the delicate relationships between plants and pollinators.

8:00 Nova

"Building The Great Cathedrals" - How did medieval builders reach such spectacular heights? Consuming the labor of entire towns, sometimes taking 100 years to build, these architectural marvels were crafted from just hand tools and stone. To save them, an international team of engineers, architects, art historians and computer scientists searches for clues to how the dream of these heavenly temples on earth came true. (Also Fri. 5/3 at 2 a.m.)

9:00 Catalyst: Shaping the Future

Evolution has programmed incredible abilities into the genetic codes of Earth's unique animals. Biologists look at animal genes, behavior, and cell structure to see how they've overcome health problems still faced by humans. (Also Sun. 5/12 at 12:30 p.m.)

9:30 Breakthrough: The Ideas That Changed The World *New*

"The Robot" - Learn how robots were first conceptualized in ancient Rome and see how their use has evolved over the centuries, from the calculator to the Roomba. Then, take a sneak peek at what future robots will be able to do.
