Teach Your Way Planner

Belongs to: _____

(Teacher)

Welcome!

Oh how we wish things were different. We were hoping that by now life would be more predictable. After two of the most difficult school years in memory, we thought for sure we would have turned a corner. But for many of us, the future feels even more uncertain than ever.

Our hearts go out to all of you, your families and students. We know that on top of a pandemic that continues to rage, you and your students are also dealing with the impact of ongoing institutional and systemic racism; extreme weather; a battered economy; and dozens of other everyday disruptions.

But we also continue to look for the light and the joy. The laughter and the lightbulbs. The imagination and the silver-linings. Relationships between parents and teachers have been forever changed by these last two years. Technologies have been adopted, adapted and advanced in new and exciting ways. Children, families, and educators are being encouraged and empowered to find creative solutions. And so we hold onto that light.

At PBS, we continue to be your biggest cheerleaders. Like you, we have also learned a lot over the past two years which is why we're so excited to offer this new planning kit, with a monthly calendar of timely resources aligned to the subjects and themes you're teaching in the classroom, and a digital planner to help you implement them into your curriculum. The planner includes a weekly planning page, a lesson plan template, and tips on using media in the classroom effectively.

Each month, you will find bite-sized professional learning opportunities; quality media that can be integrated into your classrooms and lessons; suggestions for self growth and self care; and, importantly, inclusive content that affirms the identity of your students and honors a diversity of cultural values, norms, and points of view. We also hope you'll join us for virtual events throughout the year meant to help support you, your students and your practice.

We don't know what the future holds, but we know our world is better with you, our nation's educators. Thank you again for all that you do--and please don't hesitate to let us know how we can better support you and your classroom.

Love from all your friends at ARIZONA PBS!

Six Approaches to Integrating Media

MEDIA LITERACY

Media literacy – the ability to read, analyze, and create media – is a critical skill for future digital citizens. As you plan for teaching with media, consider these approaches. How will you use media to deepen students' learning today?

SPARK

Use media early on in an experience to spark children's interest, conversations and questions on a given topic.

MODEL

Use characters in media to model behaviors, skills and approaches to learning. This modeling can then help scaffold discussion and practice of those same habits through real-world activities.

EXPLORE

Use media to investigate and research a topic, concept or idea more deeply.

CREATE

Support creativity as children use media and digital tools to express themselves and their ideas and demonstrate their knowledge.

DOCUMENT

Capture and document learning experiences as they are happening. Use digital tools to support reflection, connection making, and communication.

SHARE

Digital tools can be used to engage in two-way communication with learners and families both within and beyond the learning environment.
