

Same and Different

By

Elle Fields

School will be different

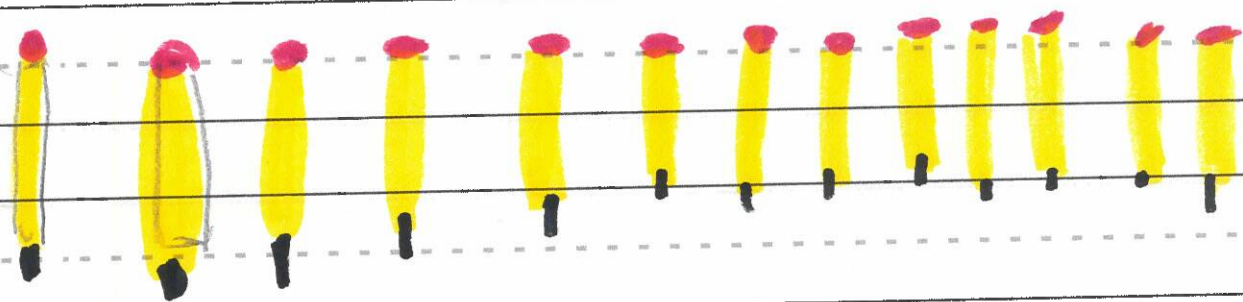

and the same in 50 years

Different.

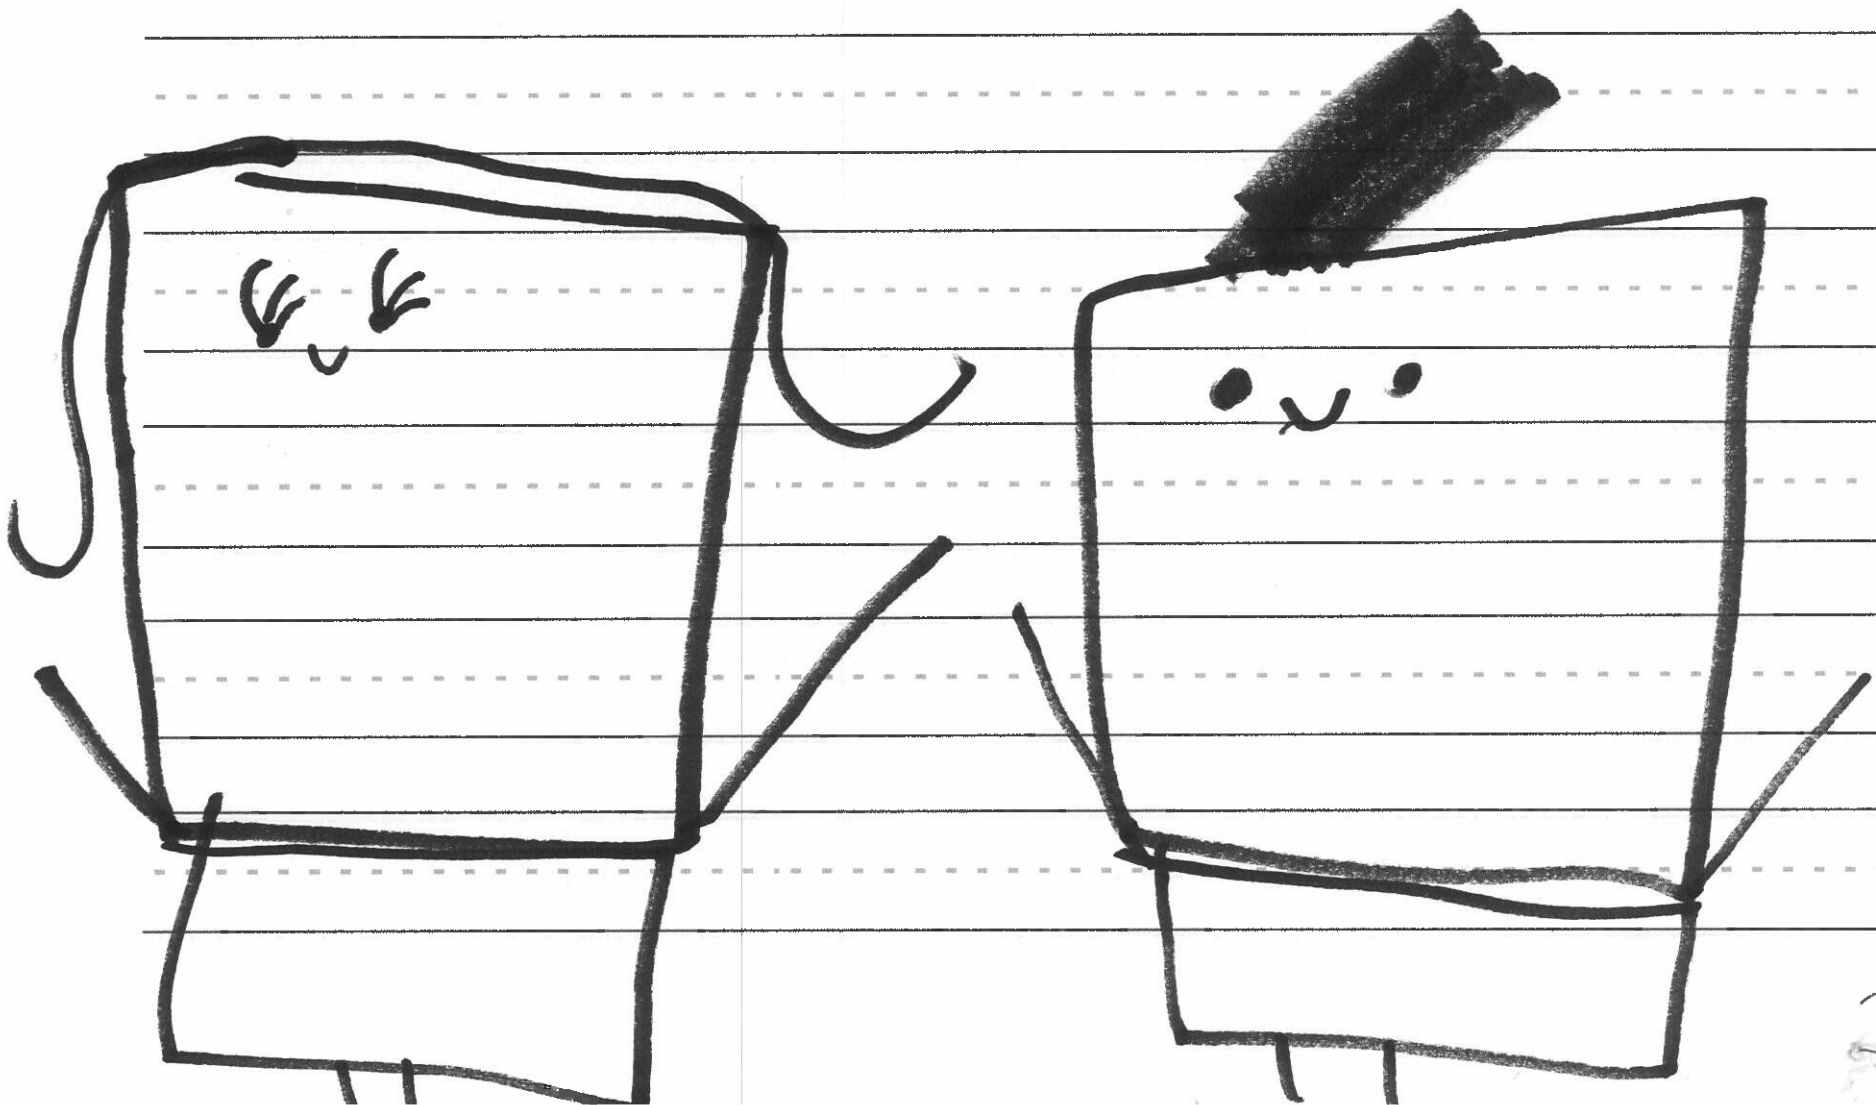

1) Kids will tell their pencils

what to write and the pencils

will do it.

d) Lots of robots can help
every kid do math.

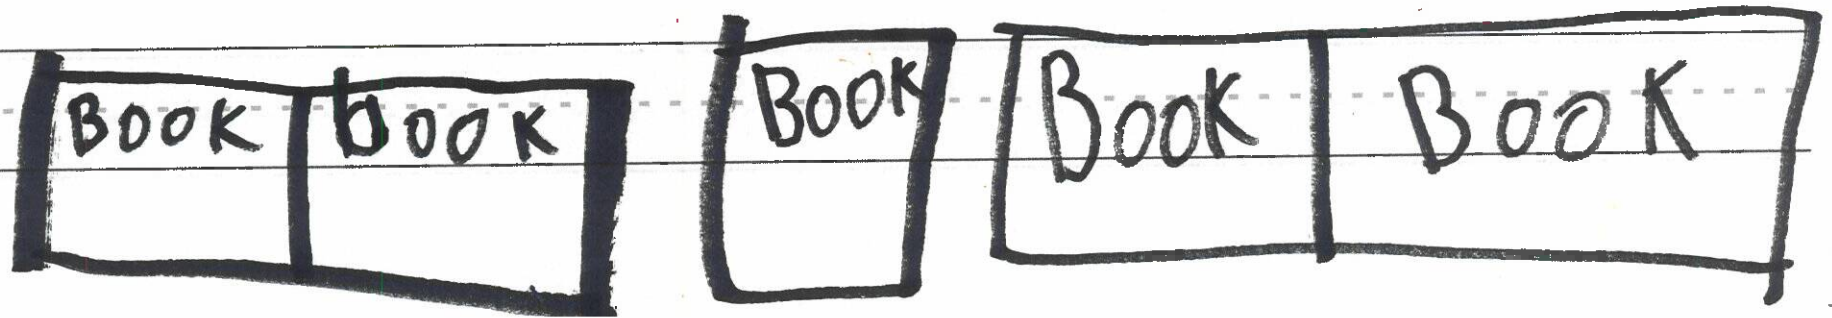

3) There will be a thousand crayons
that never break.

Some

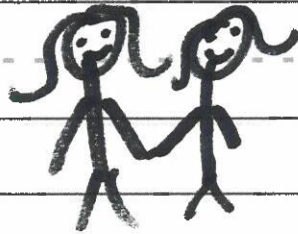

The kids will still learn to read.

2) Teachers will still smile and like students.

3) Kids will still have lots of school friends.

that's all.
