

Am I In the Future?

March 1st, 2439

One day, I woke up in the morning to find everything that I used to know vanish and turn into something completely different. It looked like I was in a world full of technology. I got ready for school and tried to find a way to get there. I found a hover board in the garage and decided to ride it to school. I was getting off Mason Way, when I saw a giant robot right next to the school! I pulled over to take a closer look at the giant robot. It turned out that the giant robot was my friend “Brynlee,” she was riding it to school. I called her, so we can go to school together. When we got to the front of the school, we went through a portal to enter the building! It was so crazy, I felt sick after we went through the portal. After we teleported into the school, we jumped onto a weird floating platform. The platform took us into a hallway full of many kinds of portals. We stopped at one of the portals that was labeled “Mathematics,” Brynlee got off the floating platform and entered the classroom through a portal. I followed her in and saw many kids looking at flying screens with things that looked like VR sets. Me and Brynlee got on the screens and put on our VR sets. We watched a video lesson on long division. After that, I ordered tacos with rice for lunch.

After I finished my lunch, I found a weird thing floating on the floor. Brynlee told me it was called a “Glider.” We went outside and played “Freeze Tag” on a floating trampoline with freeze lasers. When we came in, I cleaned up my mess from lunch and started working on a project for Brynlee. I got to get a little bit done and then we all had to go home. I rode my hover board back home and started grabbing dinner from my Chefy bot. Then I went to bed thinking “What would our next adventure be?”
