

My School Day In The Future

By: Kieran Harling

Grade 3

I arrived at my school which was a massive floating structure. This was my first clue I wasn't in 2023 anymore. I entered the building and looked at a floating screen that said schedule. I went to history class because it was listed as the first class.

I arrived there but I was 5 minutes late, because the building was a MAZE to navigate. "YoU'rE LaTe FoR cLaSs" said a robotic voice. I said, "Sorry Ma'am", apparently the teacher was a robot who was surprisingly wearing googly eyes and a wig. "ToDaY wE wILL IEaRn AbOuT dInOsAuRs".

I heard an animal screech from behind. I slowly turned my head around, and a real live VELOCIRAPTOR was in the back of the classroom! I screamed and everyone just turned their heads and looked at me like I was crazy. After a few minutes of talking about dinosaurs while they "appeared" in the room, the bell rang for reading class.

I grabbed my bag and hurried into the hallway and speed walked to reading class. Looking around and I saw another robot with googly eyes and a wig. I took one of the seats and waited for the other students to arrive. "Today we will be reading the literature classic Charlotte's Web!" "Put on your headsets, and say, "Charlotte's Web". I followed the instructions and got teleported to the farm where Charlotte's Web takes place, we watched the whole story play out. After we were done, the teacher told us: "Okay, we'll have a quiz tomorrow on the "movaculas!"

The bell rang so I went to science class, but something caught my eye. In the corner there was a time machine marked for "emergency use only". This gave me an idea, to use the time machine to go back to 2023. Long story short my plan worked. When I got back, it turns out it was 2024. When I got to my actual school, all my friends asked me: "Dude, where have you been for a year!?!?" All I responded with was: "um, I had...stuff; yeah, stuff to do."

The end, or is it?
