

SCHOOL

I LOVE IT

## Future Schools

Part 2: By: Pharaoh Johnson

Inside our future schools we would grow our gardens so we can learn how to grow our own food when we get older.

Our classrooms will have a robot train to deliver our healthy hot and cold food to us. We would all learn from laptops so we can save paper and learn how to use computers. Every classroom has a solar system roof so we can learn about the planets and stars.

Everyone would enjoy learning if future schools were like this!

# Future Schools

Part 1:

By: Pharaoh Johnson

4-22-23

In future schools students will go to school feeling safe and happy. They would always get along and share. When we play outside we would go on hikes in the mountains so we can explore nature. We would also get great exercise and air so we can be healthy. Future schools will help keep our environment clean by helping pick up trash. Animals are safe and our school environment is clean.

$2 + 3 = 5$

$2 + 4 = 6$

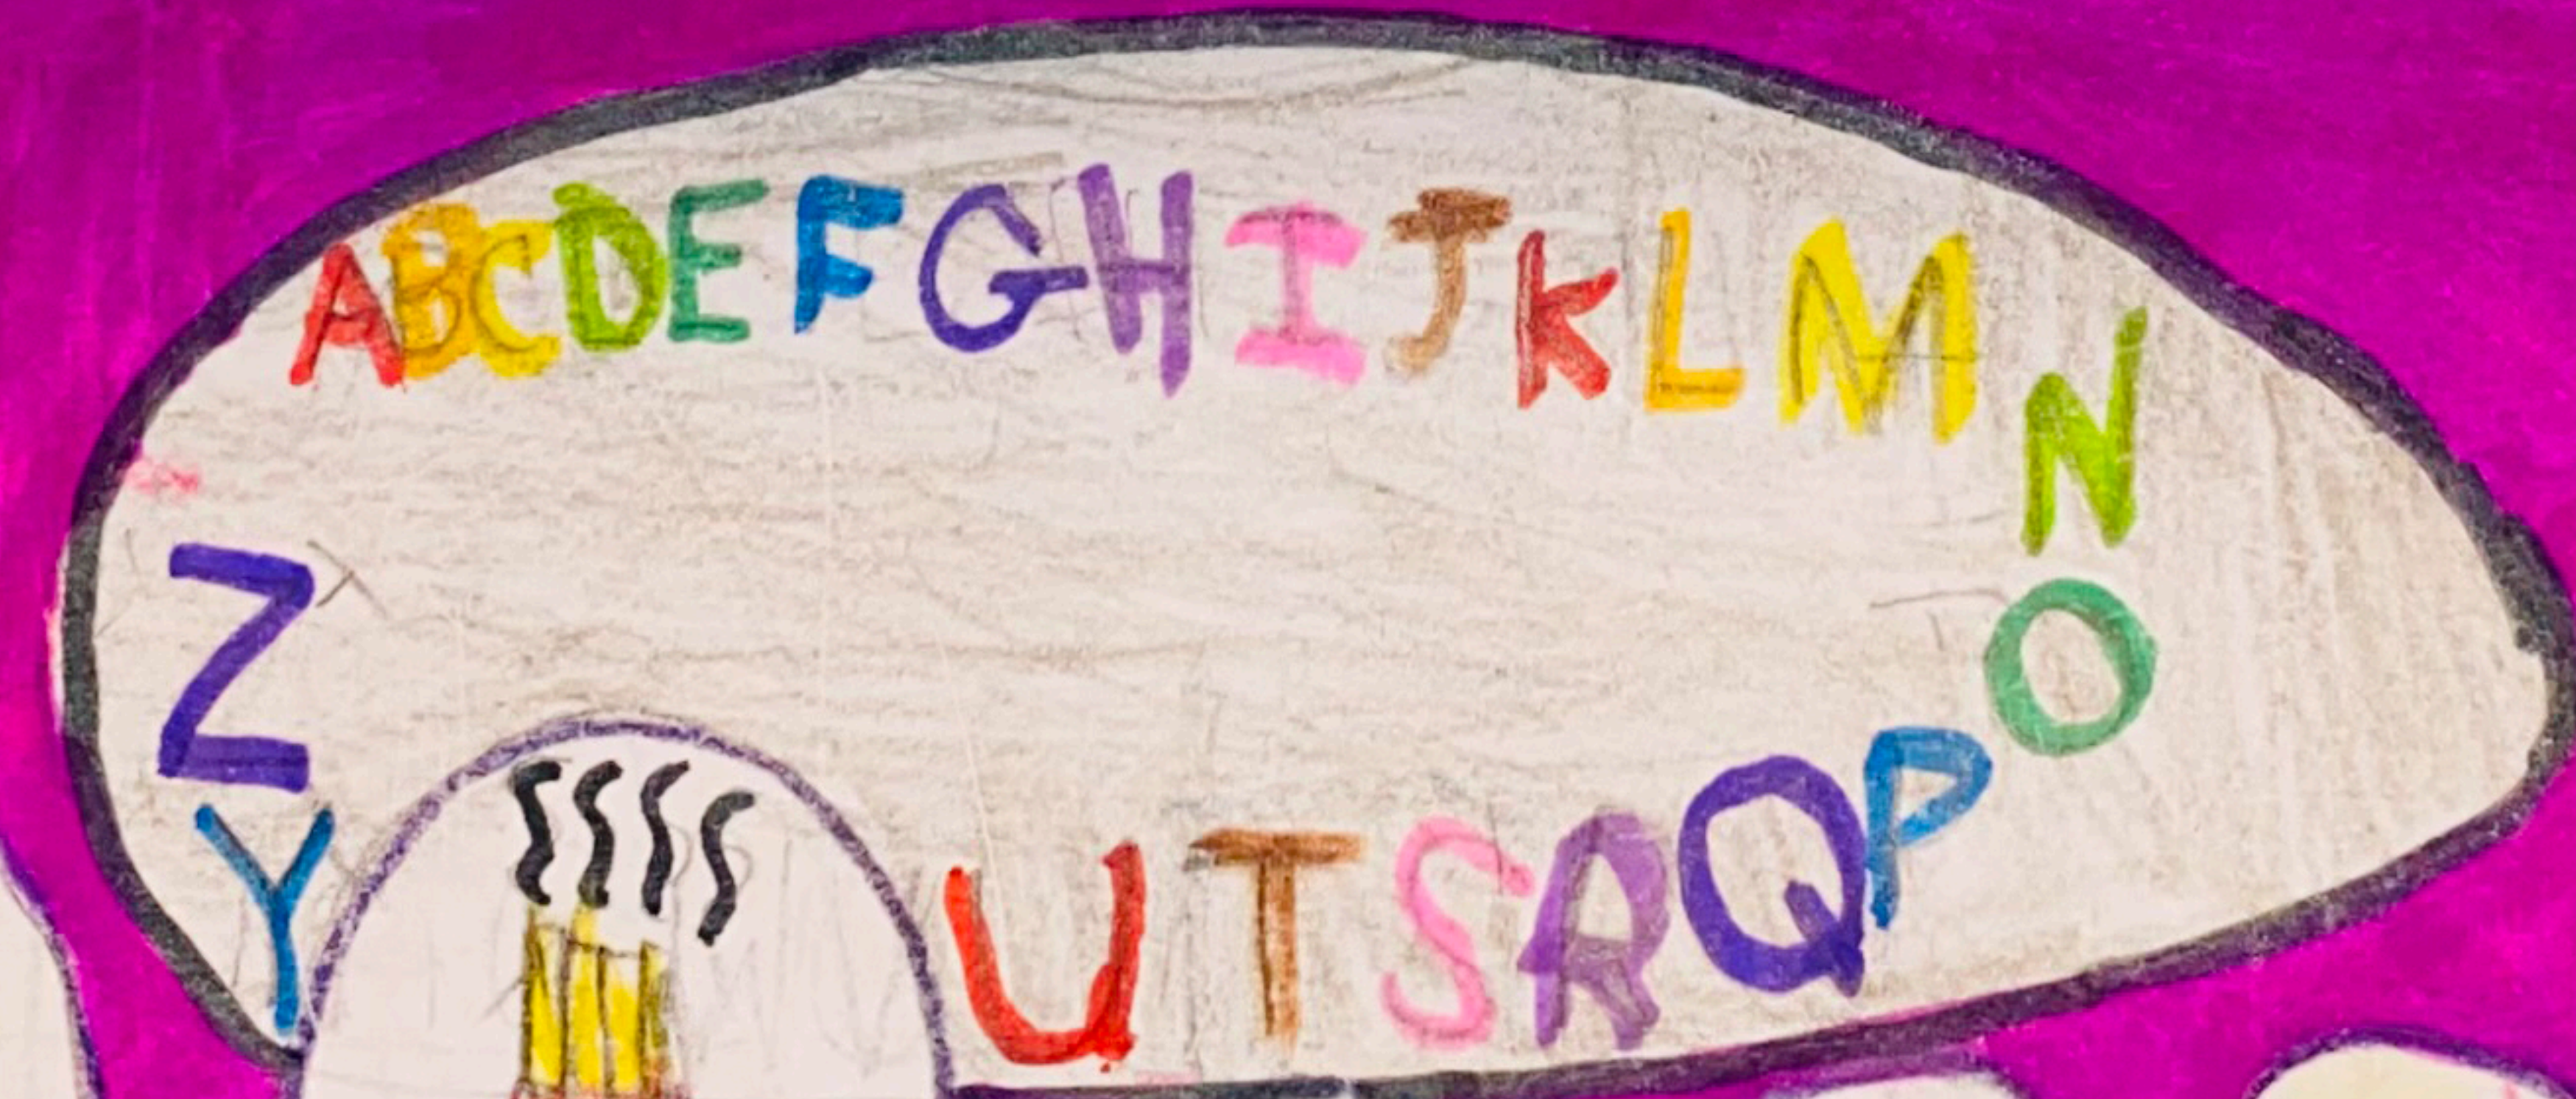

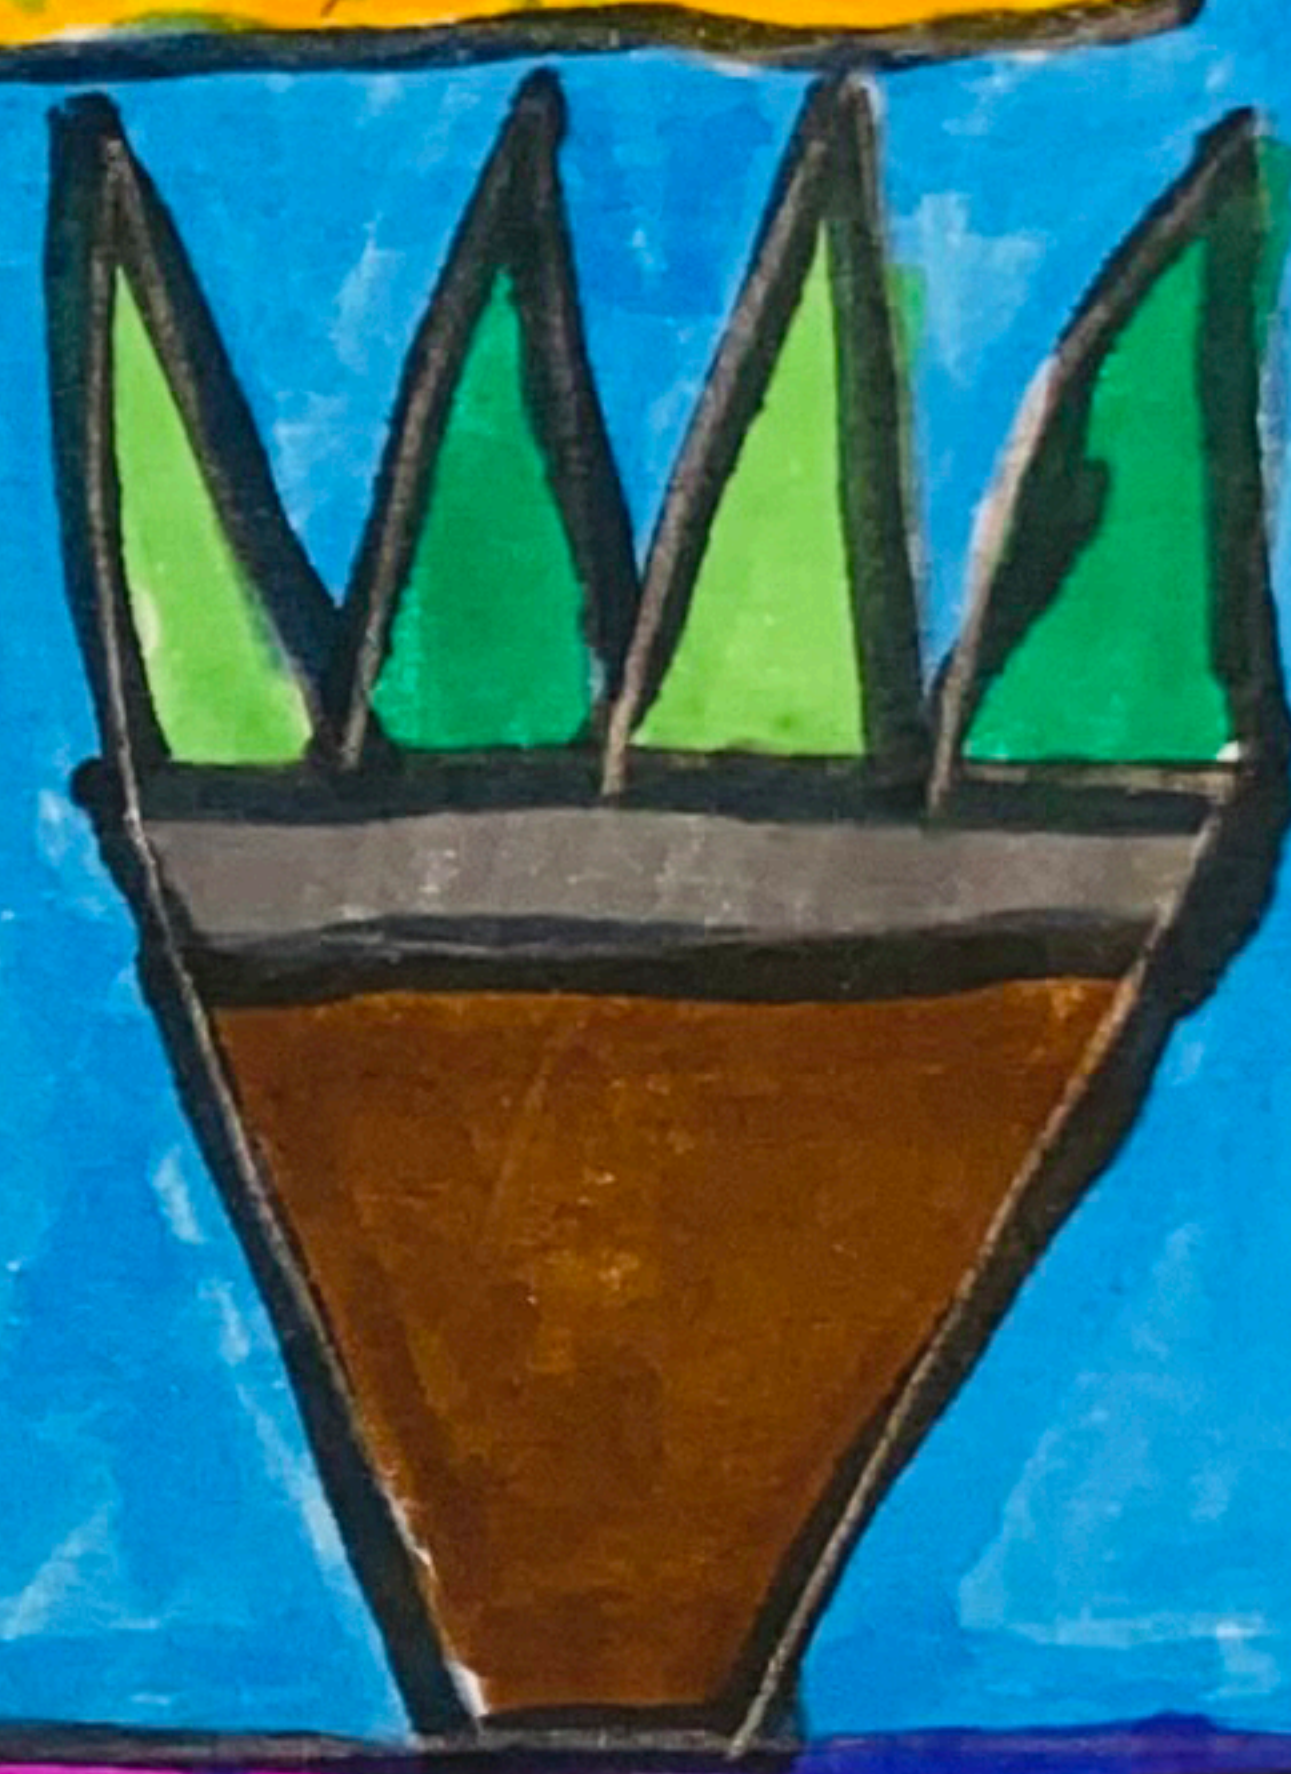

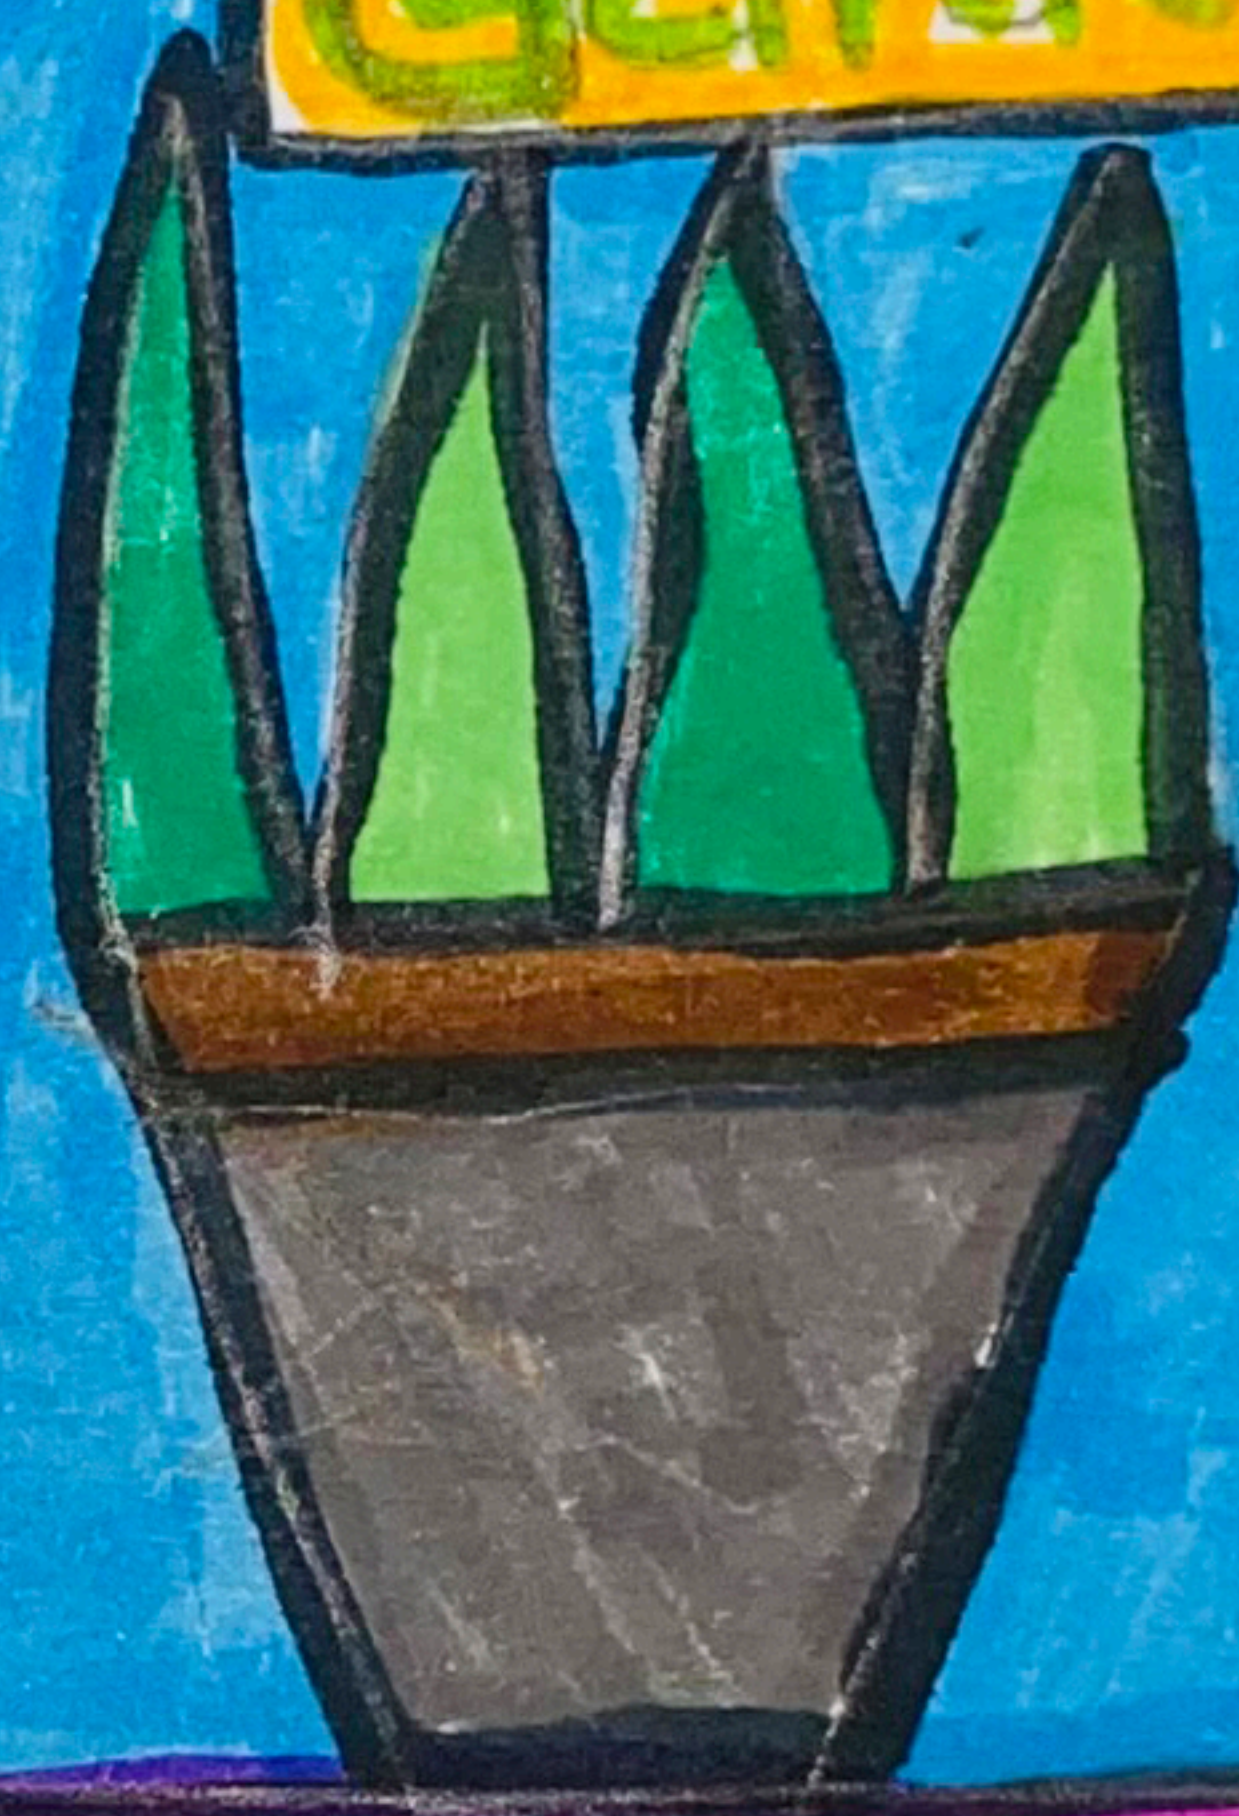

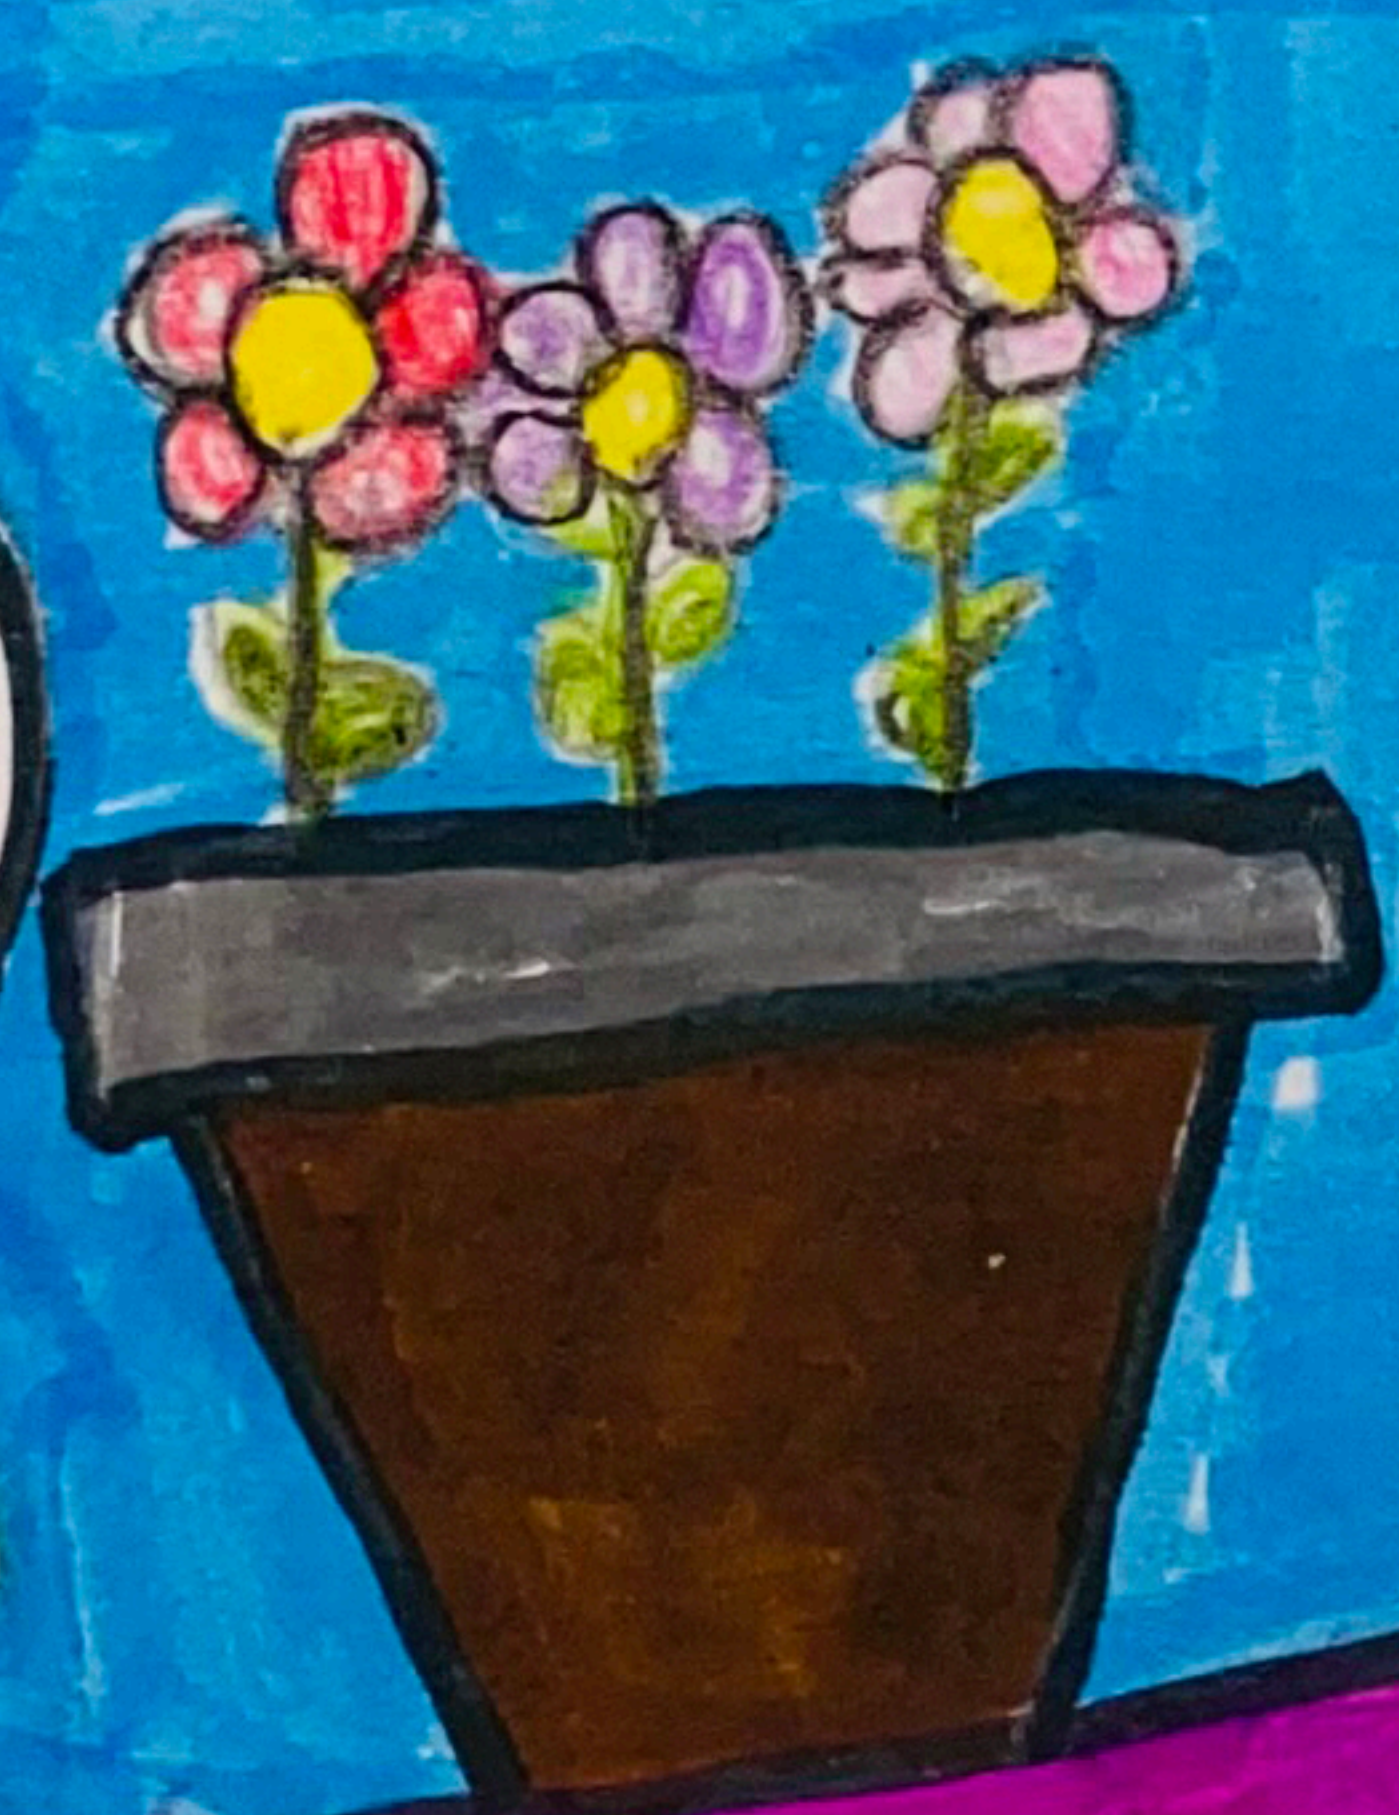

$8 + 2 = 10$

$5 + 5 = 10$

Garden Area

I love my school!

What is the future of school going to look like?
